NEW FEATURES - 2025

CGM LYTEC
Practice Management and EHR

The gold standard for hard working practices.

CGM LYTEC is a trusted and affordable practice management solution that simplifies the way you run your practice.

With each release, **CGM LYTEC** gets better. More powerful. Every year, we add new layers of functionality and usability.

Discover some of the benefits of upgrading to **CGM LYTEC** 2025.

Integrated credit card and ACH processing

New to CGM LYTEC 2025, practices can enjoy a fully integrated credit card and ACH payment processing option. Set up and automate monthly patient payments more easily with CGM PAY.

With CGM PAY for CGM LYTEC, administrators can:

- Manage refunds and voids
- Update payment methods
- Print and reprint receipts
- Save multiple payment types including a patient's preferred payment method
- Integrate with the popular patient statements offered through our own, trusted eMEDIX clearinghouse*

To simplify your transaction management, CGM LYTEC includes a new dashboard view of successful transactions, failed payments, payment plans, and saved cards—all in one location.

* Statements through our eMEDIX clearinghouse and software add-ons priced separately.

Enhanced patient responsibility estimates

Deliver better service at the point of care with the eMEDIX Patient Responsibility Estimate. Provide a good-faith cost estimate for planned procedures by quickly running a patient's insurance eligibility for the planned procedure codes. Save time with pre-configured Linked Transactions for common procedure bundles.

In CGM LYTEC 2025, this service expands for self-pay and uninsured patients.

This integrated estimate display allows the user to make any patient or insurance adjustments for coverage, copays, coinsurance, remaining deductibles, etc. Past payments and charge histories are factored in to provide a more accurate estimate. Providers can print and save patient estimates and have the option to tailor them with customizable messaging.

History of patient insurance

CGM LYTEC 2025 adds the ability to track a patient's insurance history. See when a patient's insurance was terminated or when they switched from one carrier to another.

Duplicate charge warnings

CGM LYTEC 2025 notifies users when two charges share the same date of service and provider. This important addition eliminates the hassles associated with duplicate charges.

CGM CompuGroup Medical
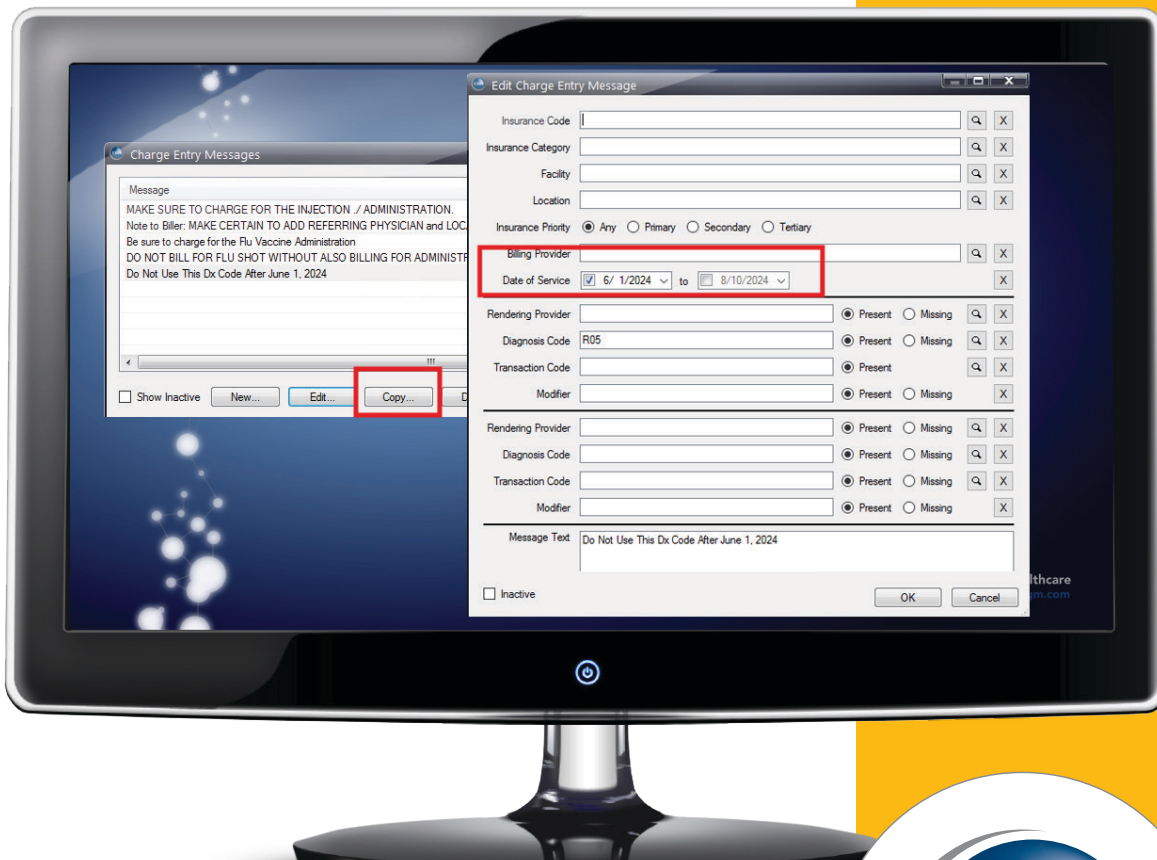

Improved, customizable Charge Entry messaging

Charge Entry messaging is more powerful in CGM LYTEC 2025. A new, date-based warning message will alert users if they enter dates of service outside of specified parameters.

For example, this is very helpful for new CPT/ICD-10 codes and early year/end-of-year charge entry. This important messaging ensures that your users are coding within a valid date range.

The messaging and rules are customizable. Copy existing messaging rules to easily assist in creating a new alert.

Smarter, expanded search capability for transaction references

No longer bound by an "exact match" restriction, the new "partial match" filter for multiple reports lets users search by references included within the transactions. This small addition removes a common pain point and helps users find the information they need much more quickly.

Upgrade to **CGM LYTEC** 2025.

Take advantage of these exciting new features, and see the host of other improvements we have made to better assist you in your revenue cycle operations.

CGM LYTEC is the gold standard for hard working practices.
