CGM APRIMA

EHR and Practice Management

CGM APRIMA offers a uniquely fast, flexible, and powerful EHR designed to complement and simplify your workflow, not hinder it. Developed to work the way you do, CGM APRIMA frees you from the constraints of templates with an intuitive, free-flowing interface designed to follow the flow of a patient visit.

Setting the benchmark for ease-of-use, speed, & flexibility

An EHR that follows you. Chart your notes by chief complaints, problems, or previous visits for fast, intuitive documentation.

Adaptive Learning machine learning means that as you work, the technology learns your style presenting clinically relevant findings based on presenting symptoms, diagnosis code, and your preferred treatments. No special programming required.

A single application, built on a single database, **CGM APRIMA** EHR and Practice Management (PM) systems are fully integrated.

Our **Anytime, Anywhere Replication technology** lets you work anywhere, anytime, with or without a connection. You can work just as you would in the office. The system automatically synchronizes information when connectivity is restored.

Goes where you go. Our CGM APRIMA Mobile smartphone app, makes the most of touchscreens, smaller tablets, and even mobile phones.

“The high level of efficiency we’re experiencing with the CGM APRIMA system is a tremendous result – and exactly what I was hoping to achieve with an EHR.”

DR. LINDSAY ACKERMAN

Why choose CGM APRIMA?

- Built-in (and expandable) knowledge base covering 70+ specialties
- Integrated patient portal for faster new-patient registration, scheduling, and patient communications; the portal is developed by **CGM APRIMA** - not a third party plug-in - so you have greater control over the content
- Fast implementation: easy to install, easy to learn, easy to customize
- With a track record of success in meeting every government certification since 2006, **CGM APRIMA** providers have received millions of dollars of stimulus payments
- Included MACRA functionality gives practices the flexibility to participate in MIPS or APM
- Technology options to suit your practice – choose traditional client/server installation or the ASP/SaaS hosted model
- A complete system, including PM and Revenue Cycle Management (RCM) solutions that can help your financial performance be as good as your medical care

Find the peace of mind you've been looking for

Improved Quality of Care

- Health Maintenance tracking provides timely follow up
- Electronic Orders and Results help ensure nothing is missed
- eRx and Drug Interaction help avoid negative interactions

Improved Patient Satisfaction

- Tools such as data trending improve patient understanding and satisfaction
- Better access to chart data and test results helps improve communication

Improved Quality of Life

- Improved workflow and efficiency reduce your daily stress
- More efficient charting creates more time for your patients and your family
- Anytime, Anywhere Access gives you the flexibility to leave the clinic but stay connected and productive

Improved Bottom Line

- More accurate coding, reduced rejections, and better billing and collections lead to higher reimbursements
- Reduced expenses generate higher net profits
- See more patients with the time saved each day
