

With **CGM APRIMA**, providers in Sleep Medicine practices tell us we're saving them valuable time with every patient visit, compared to other systems they have used.

## Customized for the needs of sleep medicine practices

- Includes clinical content specific to Sleep Medicine
- Documents Sleep History and Sleep Schedule, as well as the ability to order Sleep Studies
- Patient Portal includes Sleep Medicine exams and the Epworth Sleepiness Scale, so that patients can self-report their sleep issues prior to their visit
- Interfaces with Sleep Study diagnostic equipment and imports patient results from those tests into **CGM APRIMA**
- Order BiPAP and CPAP devices and supplies and seamlessly bill your patients for the items or process through insurance claims — our system helps guide you as to which items should be billed to patients or go to insurance
- Easily bill time for tech fees associated with home and lab studies

"We have been using CGM APRIMA for almost six years and could not be happier with our choice. The efficiency and ease of use of the program allows us to monitor all divisions of our business in addition to helping us meet the never-ending government requirements medical practices are currently faced with each day."

## Streamline and automate your practice's workflow

Through our Patient Portal, your patients fill out a questionnaire prior to their visit in which they answer simple questions that give you a complete picture of their sleep history. These questions gather information about your patients' symptoms, such as dry mouth and excessive sleepiness, or problems, such as difficulty using a sleep aid device. Any response that patients answer in the affirmative opens a new line of questioning, such as: Do you nap? Are you able to fall back asleep easily when you wake up at night?

All patient responses are downloaded from the Patient Portal into the **CGM APRIMA** EHR in just one click – no paper forms to scan. You'll spend less time documenting information that patients can provide in advance which enables you to focus more of your time on diagnosing and treating your patients.

## Flexibility to document your way

- Choose from a wide variety of ways to enter data: voice recognition, dictation/transcription, touch screen, point and click, keyboard or handwriting recognition.
- Perform a paperless workflow from check-in to check-out, saving the time of scanning paper forms.
- Download extensive, self-reported patient information prior to the patient's visit with one click, so you'll spend less time documenting sleep history and symptoms during the visit.
- Clinical staff can easily edit content, so you can spend more time with patients and less on paperwork.

## Speed and efficiency at the point of care

- No Templates. Chart the way you were trained to think and follow the flow of your exam no matter what direction it takes.
- **CGM APRIMA** EHR follows you instead of making you follow it. Chart by symptom for fast documentation. Your past notes can be carried forward to the current note so you're not charting from scratch.
- Adaptive Learning lets **CGM APRIMA** learn your preferences as you work. Enjoy a smart EHR that seems to read your mind, so you'll be up and running with minimal effort.

## Chart a patient visit faster than you can with any other system

We are saving providers a MINIMUM of 3 minutes per patient – often times much more. **CGM APRIMA** offers a uniquely powerful and fast solution that is designed to complement and simplify your workflow.
