Version

- Database Version: 19.2.0.978
- Appserver Version: 19.2.2303.1522
- Client UI Version: 19.2.2302.1522
- SQLModule Package Date: 12/4/2024

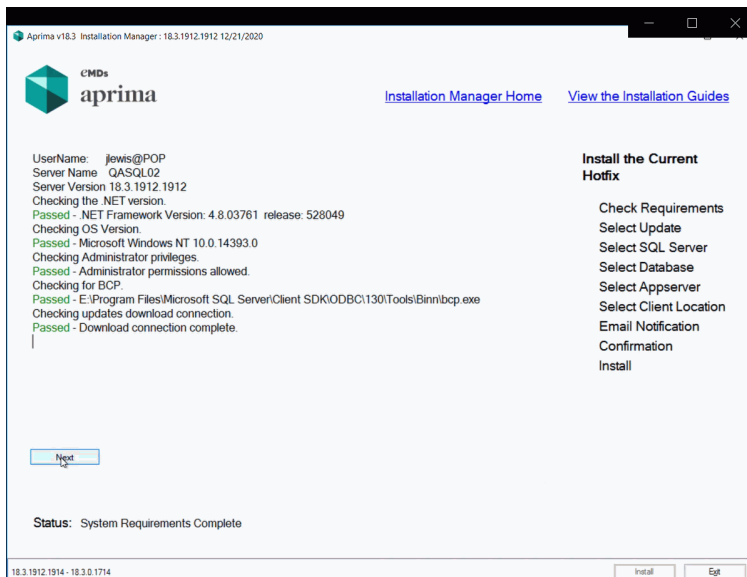

CGM APRIMA Installation Manager - Improved Update Process

You can use the CGM APRIMA Installation Manager to install the latest hotfix, upgrade to the latest version of CGM APRIMA, apply database maintenance, or install the shared client (used when multiple users share a single PC). Complete the following steps to install the latest hotfix. For more information, see the *CGM APRIMA Installation Manager User's Guide*.

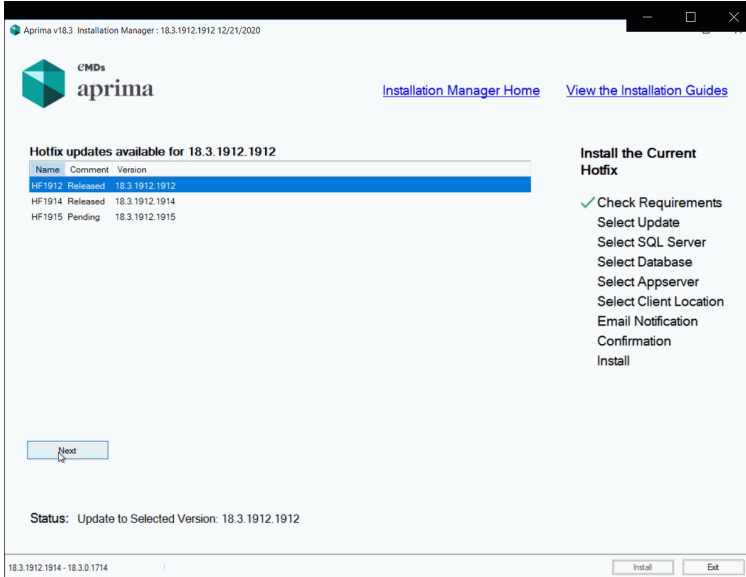

Install the Current Hotfix

Complete the following steps to install the current hotfix.

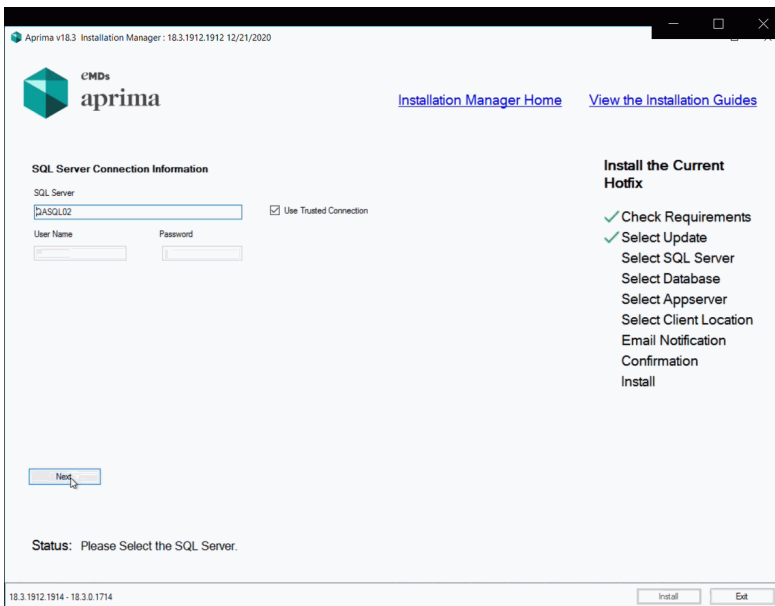

1. Click the Install the Current Hotfix link. The Check Requirements window appears.

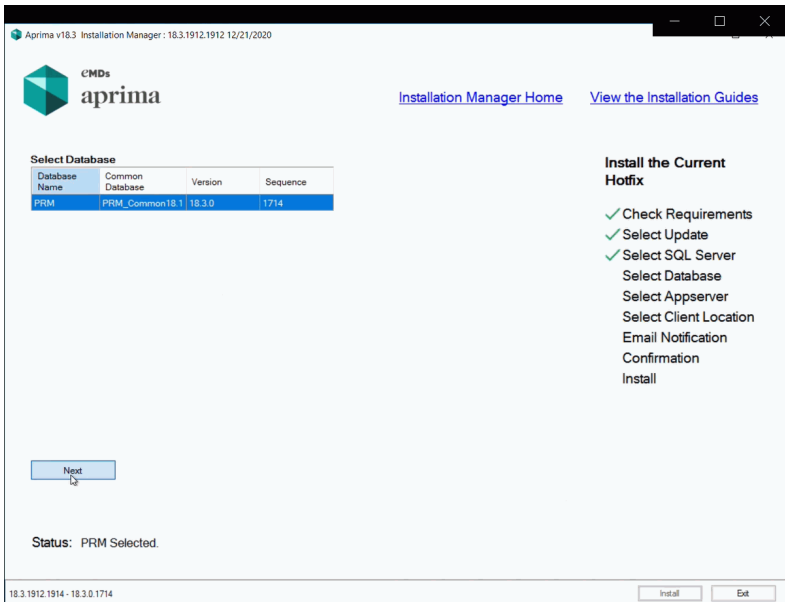

2. If any issues are found with your system requirements, address them before continuing.
3. Click the Next button. The Select Update window appears.

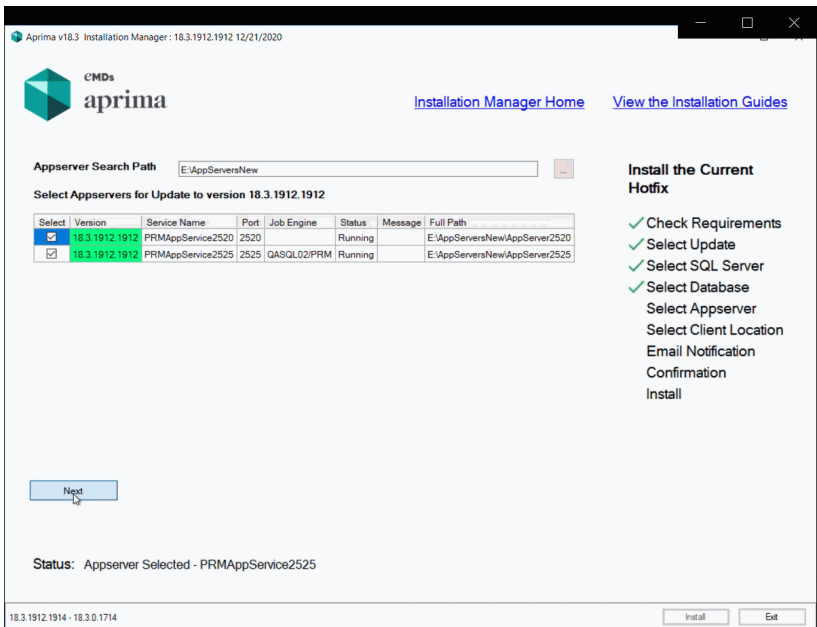

4. Select the hotfix you want to install and click the Next button. The Select SQL Server window appears.

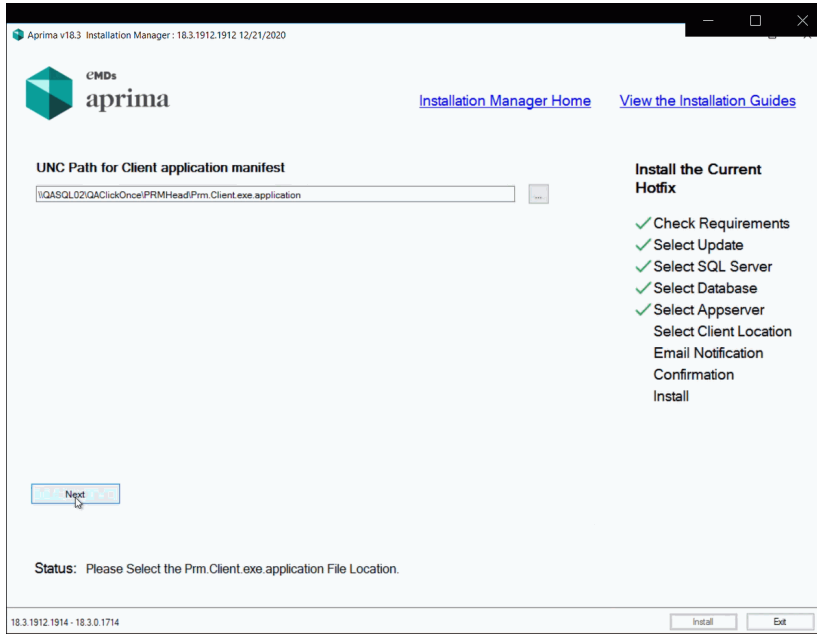

5. Verify that the information is correct and click the Next button. The Select Database window appears.

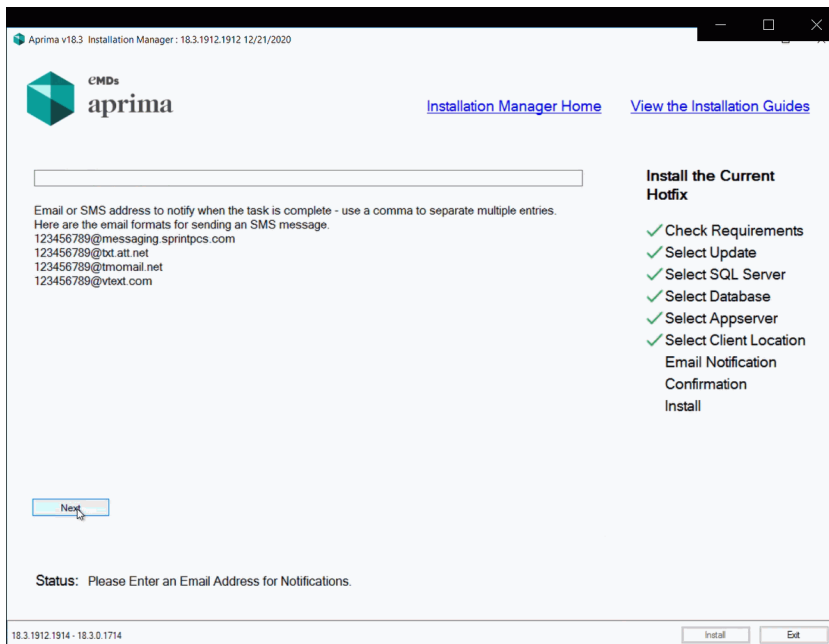

6. Select the database where you want to install the hotfix and click the Next button. The Select Appserver window appears.

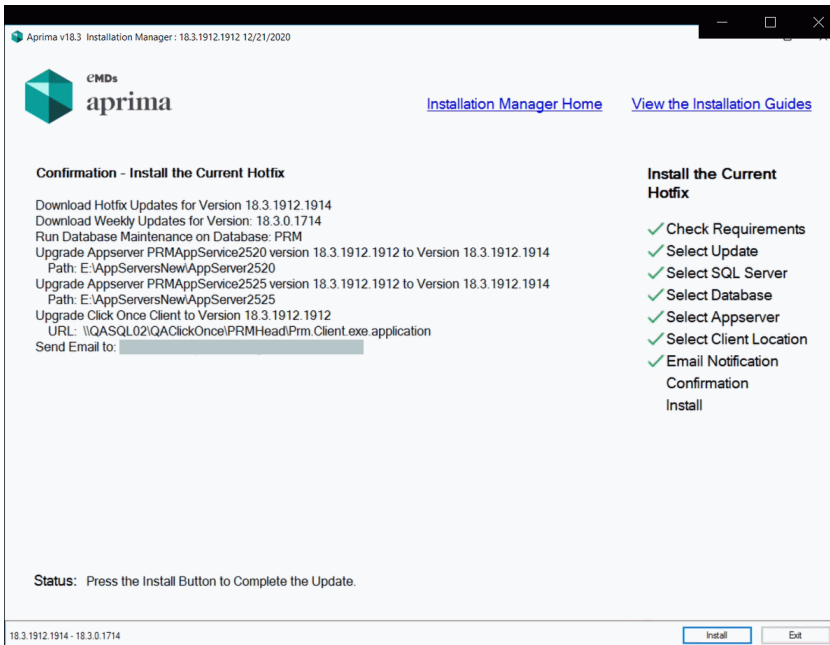

7. In the Appserver Search Path field, browse to and select the folder where the Appservers are located. In the table, select each Appserver to be updated. Click the Next button. The Select Client Location window appears.

8. Browse to the location of the shared folder where the Click-Once Client is installed and then click the Next button. The Email Notification window appears.

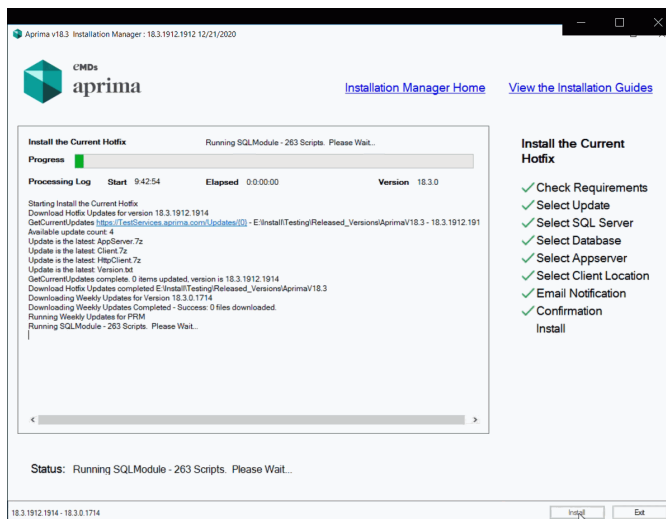

9. Enter an email or SMS address to receive an email or SMS message when the process is completed. You also can choose to leave this field blank. Click the Next button. The Confirmation window appears.

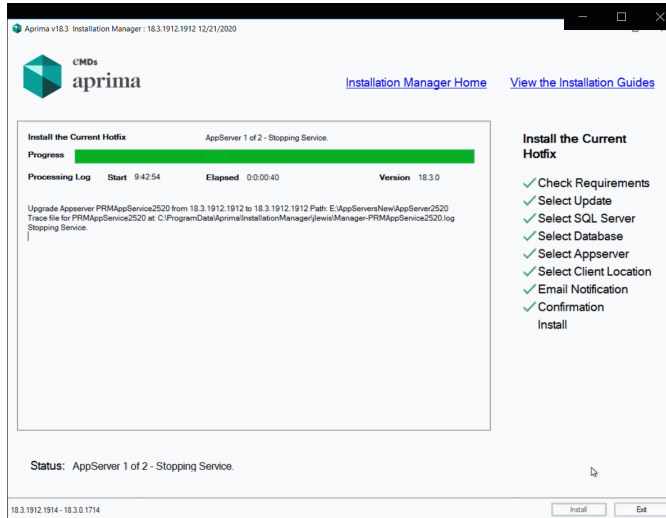

10. Verify that all items are correct. If any information is incorrect, click the Installation Manager Home link to start the process again. If all information is correct, click the Install button. All previous items selected will be updated.

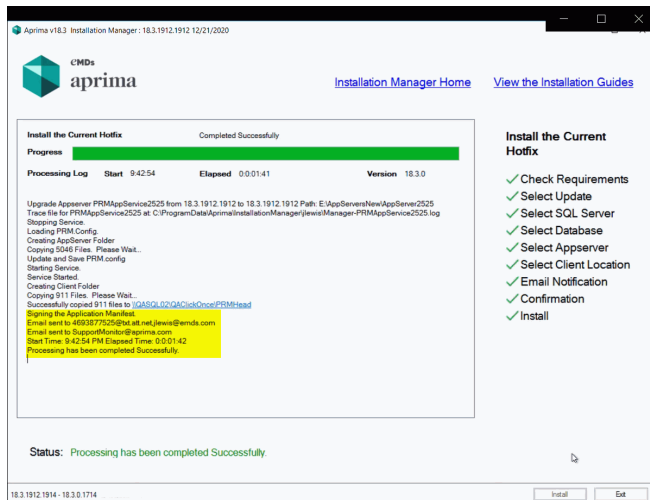

a. Downloading the hotfix and applying of database maintenance:

b. Updating and restarting the Appservers:

c. Client update and manifest signed and process complete:

11. Click the Exit button to close the Installation Manager.

Client

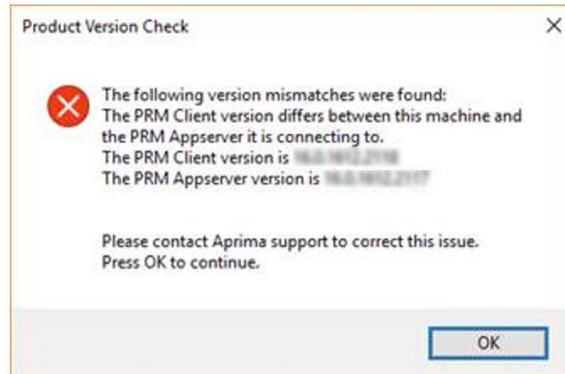

The download updates also updated the client folder in your installation folder. Please use the updated client folder to update the clients for Shared Clients and Click-Once Clients. For more information on installing or upgrading clients, please refer to the *Installation Guide* or the *Upgrade Instructions* document for CGM APRIMA.

Verification of Client and Appserver Version

When a user attempts to log in, the client application installed on the user's PC verifies that its hotfix version matches the hotfix version of the application service (appserver). A mismatch between the versions on a client

PC and the appservice must be corrected for the application to work correctly. Contact CGM APRIMA Support immediately so that the installation can be corrected.

When the client application and the appserver are not the same hotfix version, then a warning message stating the mismatch and the installed versions is displayed. The user may click the **OK** button on the warning message to access CGM APRIMA. However, the application may not function correctly and the user may experience application errors until the installation is corrected.

Verification of Installed Hotfix

Use the following process to verify that the hotfix has been completely and correctly installed. If any of the items identified in this process are incorrect, please contact Support.

1. Open CGM APRIMA
2. Click on Help → About → Versions tab

Questions

If you have questions, please contact Support at aprimaclientsupport@emds.com or 877-564-4414, Option 2.

Preliminary Superbills

CGM reminds you of the following best practice.

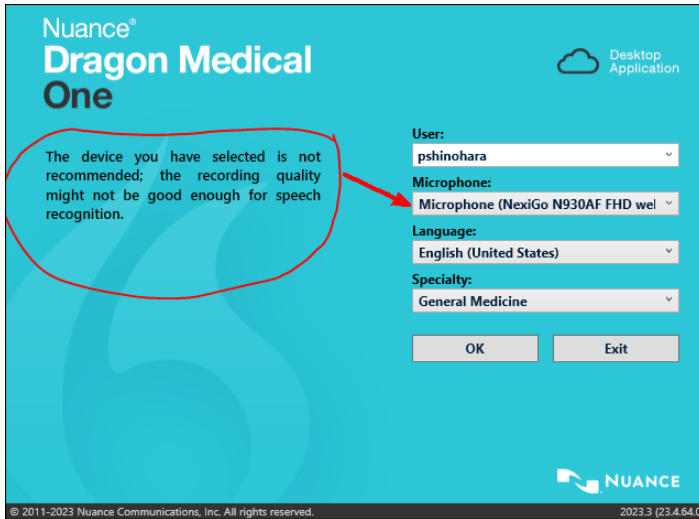

Please review all **Preliminary** superbills on a weekly basis to ensure that they are being handled and processed (filed to insurance or billed to patients) as expected. Even once a note is completed, a superbill might remain in the **Preliminary** status for several reasons, including that the provider's default status is set to **Preliminary** or that an error occurred while saving and completing the visit note.

Dragon Configuration

Issue: Since upgrading to CGM APRIMA v19, Dragon does not transfer text in a visit.

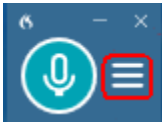

Solution: Complete the following steps.

1. Start Dragon. If you use any microphone option other than Nuance PowerMic Mobile, the following warning message will appear.

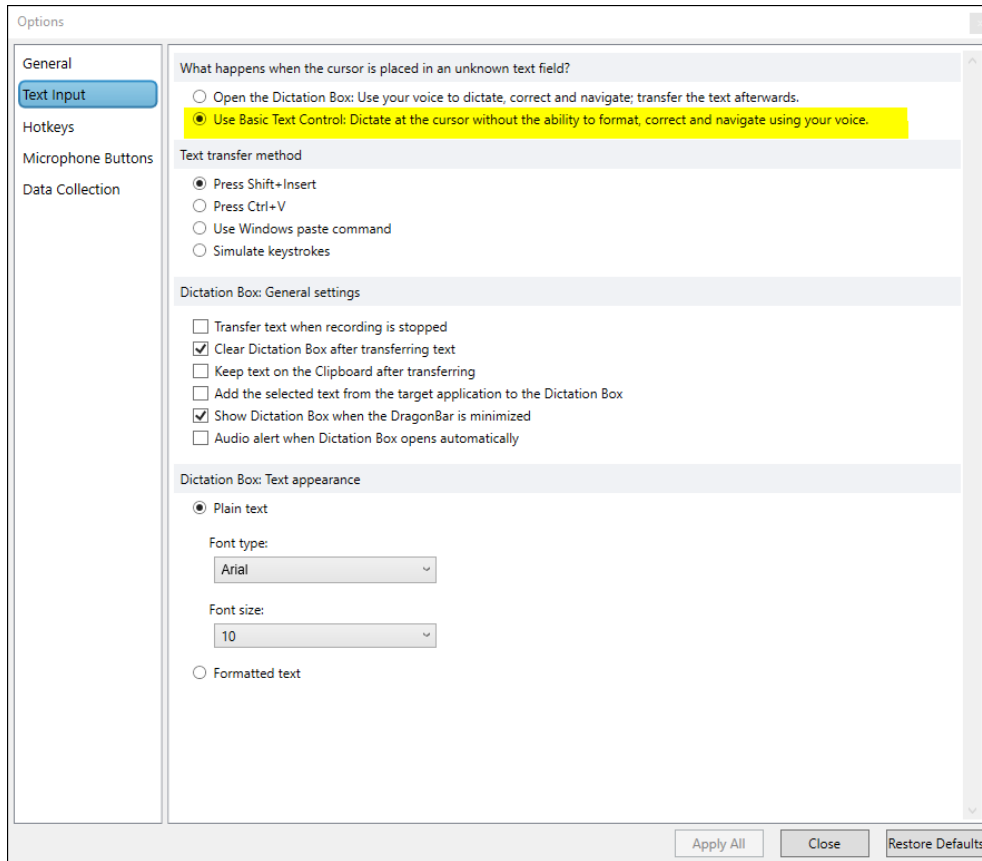

Although other microphones will work, Nuance PowerMic Mobile is the preferred microphone for best quality recording and results.

2. On the Dragon app, click the config icon and select **Text Input**.

3. On the Options window, select the option highlighted in yellow.

Known Issue

We are aware that some older machines may have historical certificates in place that could cause login issues, such as blank screens. If you or a member of your team experience this issue, please follow the process covered in [this KB](#) to address the issue for that user/machine.

Enhancements

The following enhancements have been added in this hotfix.

Claim Form Layouts

The following two new claim form layouts have been added to CGM APRIMA:

- CMS-1500-NPI-5010 Box 31 Sig On File
- CMS-1500-NPI-5010 Populate Box 30_31 Sig On File

Select either of these claim form layouts to print 'Signature On File' instead of the provider's name in box 31. If you select CMS-1500-NPI-5010 Populate Box 30_31 Sig On File, 'Signature On File' also will print in box 30; some Medicaid payers require box 30 to be populated.

These claim form layouts can be selected at the insurance payer, insurance plan, or process claims level. (143573)

Hx Tab/Problem & Dx Category

- The following changes have been made to the **Hx** tab/Problem & Dx Category user interface (UI).
 - When you select an item in the list, the entire line item becomes active. Any updates you make to the line item are reflected immediately.

Name	Related	Onset	Resolved	Status	Provider	Notes	Last Dx Date	HCC	Recorded Date	Occurrences	Info	Action
Acne rosacea		2 weeks ago		Chronic	Patterson, Frank	Here are some	9/11/2020	.125	9/11/2020	3		...
Aortic Stenosis with SEM (I/VI)		2 weeks ago		Active		Here are some	9/11/2020	.125	9/11/2020	3		...
Hypertension		4 months ago		Chronic	Patterson, Frank			.125	9/11/2020	3		...
Menopause		12/10/2020		Chronic					9/11/2020	3		...
Hypercholesterolemia		3 months ago		Active with a longer		Here are some		.125	9/11/2020	1		...
Diabetes		1 year ago		Active				.125	9/11/2020	1		...
(J02.9) Acute Pharyngitis		4/15/2007		Inactive	Patterson, Frank				9/11/2020	1		...

- For a find control, when you select the body of the field, the Currently Selected/Most Frequently Used/Most Recently Used drop-down displays based on the prepopulation set.

Name	Related	Onset	Resolved	Status	Provider	Notes	Last Dx Date	HCC	Recorded Date	Occurrences	Info	Action
Acne rosacea				Active	Dr Sabers, K.				12/28/2023	2		...
Headache									12/27/2023	1		...

(J02.9) Acute pharyngitis		12/5/2023			Burns, Jb, MD		7/16/2024		7/16/2024	3		...
(N76.0) Acute vaginitis		08/24/2021		Active	Dr Sabers, K.		6/6/2024		7/9/2024	5		...
(Z68.54) Body mass index (BMI) pediatric, greater than or equal to 95th percentile for age		11/9/2023		Active	Dr Sabers, K.		11/13/2023		11/13/2023	2		...
(F22) Delusional disorders		1/4/2024		Active	Burns, Jb, MD		5/29/2024	0.309	5/20/2024	5		...
(R13.10) Dysphagia		3/7/2024		Active	Dr Sabers, K.		6/6/2024		7/9/2024	3		...
(Z00.00) Encounter for general adult medical examination without abnormal findings		11/1/2023		Active	Burns, Jb, MD		1/19/2024		1/19/2024	5		...
(I10) Essential (primary) hypertension		8/31/2023		Active	Burns, Jb, MD		1/4/2024		1/4/2024	8		...

- When you click a magnifying glass icon, the corresponding find table window opens.
- Click the new **Refresh** button to manually refresh the window. The window will not automatically refresh as you make updates so the set order of the window may not be reflected correctly. (171904)

ERA Rejections Report

- The ERA Rejections report has a new report parameter: the **Include Extended Rejection Reasons** check box. When this check box is selected, any superbill touched by the ERA that meets any of the following criteria will be counted as a rejection.
 - The superbill balance is zero, but the claim status is not **Complete**.
 - The superbill balance is not equal to zero and the claim status is **Complete**.
 - The superbill balance (insurance/patient) is negative, but the status is not **Overpaid**.
 - The superbill balance is equal to or greater than zero, but the status is **Overpaid**.
 - If the adjustment dollar amount is equal to or greater than the charge dollar amount, it will appear on the **ERA Reject** tab (Applicable for Charge \$ > 0.01).
 - The superbill insurance balance is greater than the charge amount.
 - Any superbill processed without reason codes/group codes at the procedure level at the time of electronic posting are included in the ERA Rejection report. (This is on a superbill procedure level, meaning that if any procedure on a superbill doesn't have a group or reason code, then the superbill will be counted.) \$0 charges and codes that get paid at 100% of charge are excluded from this rule. No adjustment or transfer to the next payer/patient means that there is no reason for there to be a group/reason code.
 - The superbill balance is the patient's responsibility.
 - The superbill balance is the insurance's responsibility, but the superbill status is **Pending Patient Payment**.

The **Include Extended Rejection Reasons** check box is cleared by default. (160527)

SSL Certificate

- This hotfix requires a new SSL certificate issued by CGM APRIMA, which is an updated version of your existing certificate that was issued in 2016.

The first time you run the PRM client after upgrading to hotfix 1522, you will be prompted to install the new certificate.

Click the **Yes** button to proceed. If you do not accept this certificate, the PRM client will not be able to connect to the server. (184119)

Fixed Items

The following items are fixed in this hotfix.

New Client/AppServer Fixed Items

ID	Title	Hotfix
169068	Attachment Approval: Default time is not displayed in 'Activity: Minutes' on CCM/BHI/CPO slider after minutes are approved.	v19.2 HF1522
177832	Attachment Approval: Unexpected right-click menu option 'Reply' for inserted signatures.	v19.2 HF1522
176681	Azure relay updated.	v19.2 HF1522
181871	Bamboo PDMP browser error.	v19.2 HF1522

174525	CCM/CPO/BHI: Selecting the Default Minutes Approved Checked check box for Practice Settings doesn't result in Minutes Approve box selected on message in CCM/CP/BHI slider.	v19.2 HF1522
172112	CGM APRIMA errors when saving visit notes.	v19.2 HF1522
174122	DPN: Patient referral message generation of formatting model for MSPs outputs all PtProviderTracking entries.	v19.2 HF1522
180948	eCR: ListProductParameter of 'eCRInitialTriggerMessagesJob' has incorrect date.	v19.2 HF1522
180310	Ekos/Aprima: Claim Add/Update.	v19.2 HF1522
174390	Ekos/Aprima: Rejection Notes API.	v19.2 HF1522
176151	Ekos/Aprima: Superbill History API.	v19.2 HF1522
180548	Ekos/Aprima Integration: Charge Details API.	v19.2 HF1522
181095	Error after upgrade to 1521: Out of memory error when visit without SP attempts to process superbill.	v19.2 HF1522
181294	FNC: Rx NOW Save Error timeout when sending orders.	v19.2 HF1522
169071	FND: Custom weight observation causes the Vitals tile to lock FND.	v19.2 HF1522
181978	FND: Problems & Diagnoses: +Visit Dx is causing diagnosis description and HCC score incorrect after adding.	v19.2 HF1522
177815	FND Updates: Superbill is not updated with DX/SP codes when superbill is in syncable status.	v19.2 HF1522
182043	Formatting Model: Assessment Form fields that contain column values do not output data.	v19.2 HF1522
177286	Formatting Model: Generate Assessments only displays one iteration of form.	v19.2 HF1522
171904	History > Problem/Diagnosis update load times and UI.	v19.2 HF1522
180214	Homepage: Option 'Modify Current Settings' is available for users without security.	v19.2 HF1522

170134	Implement multiple X12 835 in a file.	v19.2 HF1522
180922	Interfaces: Improvements to VXU error handling.	v19.2 HF1522
162196	Patient problem/diagnosis refresh loads to the top.	v19.2 HF1522
174813	Patient Results: Results are lost if user creates new result after receiving locked result message (part 2).	v19.2 HF1522
177179	Prescription without pharmacy sends to prescription queue when there is no formulary.	v19.2 HF1522
177182	Problem/Diagnosis History: Need to scroll to display find controls at bottom of page.	v19.2 HF1522
176843	Problems/Diagnosis History: Status and Provider fields no longer appear as gray text for deleted problems/diagnoses.	v19.2 HF1522
176898	Procedure unit does not update on AR_LedgerDetail under certain circumstances.	v19.2 HF1522
174887	Reorder Columns: Unable to select line item to reorder.	v19.2 HF1522

Weekly Maintenance Fixed Items

ID	Title	Hotfix
176707	19.3 Responsible Party Aging Detail Report incorrect.	v19.2 WF1522
174767	Appointment creation based upon provider calendar/resource calendar.	v19.2 WF1522
184119	APRIMA CA updates 2024.	v19.2 WF1522
181332	Docbuddy: New endpoint to Group 4 endpoints into one.	v19.2 WF1522
175576	eCR: Additional Outbound XML not populating upon activating.	v19.2 WF1522
143573	Enhancement: Medicaid Payers requesting 'Signature On File' to populate in Box 31 of ALL paper claims.	v19.2 WF1522

160527	ERA Rejections Report enhancement.	v19.2 WF1522
151402	HC: Automate sending AVS to PCP for Wellcare/Aetna.	v19.2 WF1522
184120	Insurance Aging Detail truncation error.	v19.2 WF1522
173153	Patient Results: Preview does not contain date information (all results are present).	v19.2 WF1522
181473	Prescription Queue: Filters out messages containing a subtype.	v19.2 WF1522
175575	SDOH assessment forms generate an expired diagnosis code.	v19.2 WF1522
184580	Write off balance locking up CGM APRIMA.	v19.2 WF1522
