

# THE POWER OF CGM LABDAQ®

**CGM LABDAQ®**

Laboratory Information System

**CGM LABDAQ** is a laboratory information system that supports veterinary diagnostics for reference labs and veterinary clinics performing in-house laboratory testing.

- Provides veterinary-specific features
- Increases efficiency
- Enables integration with internal or external software systems
- Ensures data integrity

Synchronizing Healthcare

**CompuGroup  
Medical**

## VETERINARY FEATURES

**CGM LABDAQ** is a versatile laboratory information system. Used commonly for human testing, **CGM LABDAQ** includes veterinary-specific features that bring the power of **CGM LABDAQ** to the veterinary lab.

- Manage data including species and breed with unlimited reference ranges
- Document both animal and owner information
- Create user-defined fields to manage relevant information. Record whether or not a pet has been spayed or neutered, has a microchip, and more

## AUTOMATED PROCESSES AND INCREASED EFFICIENCIES

**CGM LABDAQ** automates processes through the different phases of veterinary testing. Improve workflow, reduce turnaround time, and increase efficiency.

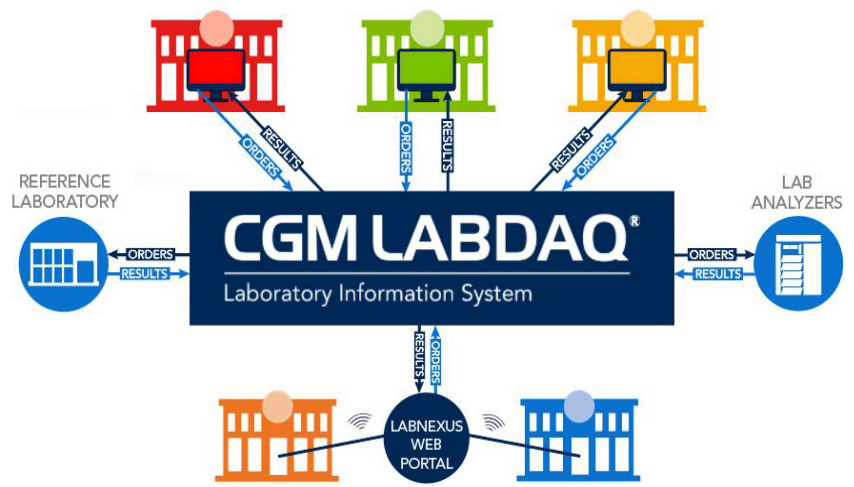

- Import electronic orders via the cloud-based **CGM LABNEXUS** Laboratory Outreach Solution or a client's practice management software
- Scan barcodes for efficient specimen receipt
- Connect to analyzers and enjoy automated workflow solutions
- Minimize manual processes and paper documentation with workflow management and calculations
- Increase productivity, minimize errors, and streamline decision-making with user-defined rules
- Scan and attach important documents
- Distribute results via export to **CGM LABNEXUS**, practice management software, or fax/email reports
- Monitor usage and compliance with comprehensive management reports

## TOTAL CONNECTIVITY

CGM LABDAQ processes orders and disseminates results, providing the ability to effectively share data throughout your facility and beyond with connections to third-party software.

- Connect to analyzers
- Interface with practice management systems. CGM LABDAQ can send discrete data as well as PDF documents
- Connect to reference labs and other third-party software
- Receive orders and send results with the cloud-based CGM LABNEXUS outreach portal

## DATA INTEGRITY, SECURITY & SCALABILITY

CGM LABDAQ has intrinsic functionality for protecting data integrity and performing data recovery.

- Recover data up to the moment of failure
- Back up data automatically with no interruption or downtime
- Back up data locally or transfer data remotely to client-provided location
- Store data with no limits other than physical storage capacity
- Rely on user controls and security including passwords, permissions, and auditing

## QUALITY CONTROL

CGM LABDAQ enables easy and accurate quality control testing and review.

- Run QC testing without the need to send an order to the analyzer
- Stop the release of results if quality testing fails or has not been performed
- Electronically review quality control results
- Display multi-level controls using Control Graph Studies

## SOFTWARE OPTIONS

CGM LABDAQ grows with your lab and supports additional options for data mining, specimen tracking, and inventory management.

- Track reagent lots and consumables; monitor inventory levels and expiration dates with **Inventory Management**
- Find specimens easily with **Specimen Storage**
- Perform queries by sex, species, breed, test results, diagnoses, and more with **Data Miner**
