

WEB PORTAL

CGM SCHUYNET

Laboratory Outreach Solution

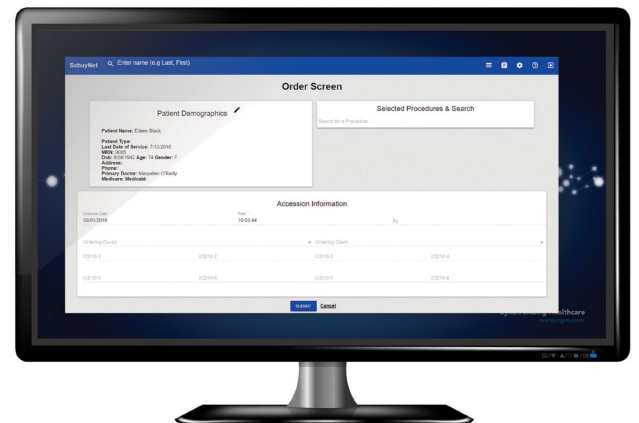

Receive orders and send results

Reference labs can offer lab results directly to patients or save on the cost of EHR interfaces when supporting smaller providers with the secure, HIPAA-compliant **CGM SCHUYNET** web portal.

Personalize your browser-based web portal with the name, logo, and details of your laboratory, and use it as a competitive advantage to earn the business of new providers.

Key Features

- Integrates with your existing website or stands on its own
- Attracts new providers with easy workflow for orders
- Increases access to lab results with custom, printable graphs and reports
- Advertises your lab every time physicians place orders
- Delivers direct-to-patient results through optional Patient Portal
- Integrates with optional QR code result report when lab results must be verified

Synchronizing Healthcare

Accept orders from providers, deliver results

With Clinician Orders and Clinician Results, your lab uses **CGM SCHUYNET** to create a seamless connection between the lab and the providers you serve.

Providers can quickly order diagnostic procedures and view results through the intuitive, web-based interface. In addition to enjoying quick access to results, providers can view and print custom graphs and reports directly from the **CGM SCHUYNET** web portal.

Offer direct-to-patient results with Patient Portal

Doctors and patients increasingly expect—and demand—that the patient can access their own laboratory result record online.

I want to...

- ...see my most recent laboratory results
- ...see my previous laboratory results
- ...view my personal information
- ...give feedback

Welcome Test Patient

Here are your most recent results

Specimen Collected: Dec 12, 2018 8:22 AM
Ordered Items: GLU,CHEM,LYTES,CBC [View Report](#)

Have additional questions concerning your results? Please consult your doctor.

HEMATOLOGY

Test	Result	Units	Reference Range	Learn More Online	Graph past results
WBC	5.3	10 ⁹ /L	3.3-10.5	i	Graph
% LYMPHS	29.6	%	22.4-43.6	i	Graph
% MONOCYTES	11.3 (High)	%	6.2-9.8	i	Graph
% GRANULOCYTES	57.2	%	48.9-69.9	i	Graph
% EOS	1	%	-	i	Graph

The optional Patient Portal allows patients to look up their lab results directly and securely. The doctor's office no longer needs to read lab results to patients over the phone or to mail out paper reports in an envelope. The patient no longer has to drive across town to retrieve a paper copy of their results to take to a consultant.

Patient access via the portal is easy and secure. The patient signs in securely online, and their most recent laboratory results are displayed. Past results can also be viewed for comparison. LOINC-code-enabled lookup of test information and graphing of a series of results are also available.

Create verifiable results with QR codes

Whenever an employer or other agency needs to verify a person's lab results, the optional QR code feature provides the simplest solution.

The QR code is applied to a special report from within **CGM SCHUYLAB**, and that mobile-friendly link points securely to the original results in **CGM SCHUYNET**. This second layer of verification confirms the authenticity of the paper result report.
