

The ONLY Fax Solution Designed for Healthcare

Kno2 and Aprima, an eMDs company, have come together to bring an integrated HIPAA-compliant cloud fax solution designed with you in mind, addressing the long-standing challenges healthcare providers everywhere have continued to face with fax.

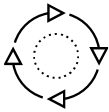

Kno2 closes the gap between traditional cloud fax and emerging interoperability workflows for exchanging patient records...giving significant time savings back to you to reinvest in your patients.

With Kno2, reconcile patient information quickly back to the chart. With a received fax, users can quickly attach a document to the patient, a specific visit or one or more orders for the patient. By attaching a received fax back to an open order, Kno2 triggers a workflow that closes the order and ensures the results are reviewed by the assigned provider(s). Sending a fax is just as easy. From every part of the patient chart in Aprima, a fax can be sent through a single click in the EHR, driving significant time savings over other fax solutions.

World Class Cloud-Faxing Designed for Healthcare

Paperless cloud faxing that allows users to send and receive documents from anywhere inside Aprima. HIPAA-compliant robust fax technology with no long distance or toll-free charges and no additional hardware requirements. Port existing fax numbers or get a new one.

Complete Aprima Integration

Download faxes directly to the patient's chart while streamlining document import workflows with patient, visit, and order lookups. Automatically close open orders/referrals and attach associated results. Sign and annotate all received faxes. This seamless integration enables the user to send from everywhere within a patient's chart.

Security

All information managed by the Kno2 platform is secured using advanced technologies that are HIPAA-compliant, encrypted at rest and in transport, and fully audited!

Document Management Tools

Bypass document linking and attach medical records directly to a patient's chart. Route faxes to the appropriate staff based upon predefined rules. Perform document QC, document breaking, page deletion. Includes review/task assignment and patient/document type assignment.

Reporting

With Kno2 reporting, gain visibility to all the fax activity happening in your organization. Make informed decisions and transition to more electronic forms of exchange starting with your highest volume fax workflows.

Network Invite

Want to stop using fax altogether? Easily invite the healthcare providers you fax with frequently to use more secure, electronic forms of exchange. Reduce fax volume and its associated costs and further improve your document workflows.

SOLUTION BENEFITS

Integrated with Aprima for Optimized Workflows:

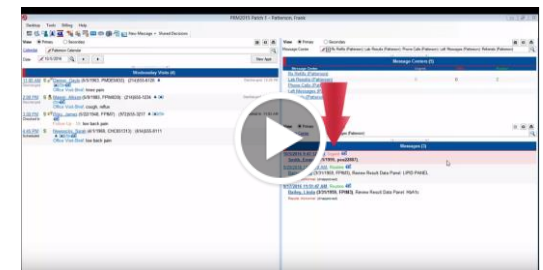

- Patient, Visit and Order Lookup
- Task and Reviewer Assignment with online annotation and signature
- Close loop referral workflow
- Automated Send/Receive
- Bypass Document Linking and Attach Medical Records Directly to Patient Chart
